KOLEOS - Section 7

Contents

**71A BODY INTERNAL TRIM**
- Floor carpet: Removal - Refitting 71A-1
- Headlining: Removal - Refitting 71A-3
- Cab floor lining: Removal - Refitting 71A-6
- Front door sill lining: Removal - Refitting 71A-7
- Rear door sill lining: Removal - Refitting 71A-8
- C-pillar lower trim: Removal - Refitting 71A-9
- A-pillar trim: Removal - Refitting 71A-10
- B-pillar upper trim: Removal - Refitting 71A-12
- B-pillar trim: Removal - Refitting 71A-14
- C-pillar upper trim: Removal - Refitting 71A-15
- Rear end panel lining: Removal - Refitting 71A-16
- Luggage compartment floor lining: Removal - Refitting 71A-17

**72A SIDE OPENING ELEMENT TRIM**
- Front side door trim: Removal - Refitting 72A-1
- Rear side door trim: Removal - Refitting 72A-3

**73A NON-SIDE OPENING ELEMENTS TRIM**
- Tailgate lining: Removal - Refitting 73A-1
- Tailgate hatch trim: Removal - Refitting 73A-2

**75A FRONT SEAT FRAMES AND RUNNERS**
- Front seat frame: Removal - Refitting 75A-1
- Front seat control keypad: Removal - Refitting 75A-5
- Complete front seat: Removal - Refitting 75A-6

**76A REAR SEAT FRAMES AND RUNNERS**
- Complete rear seat: Removal - Refitting 76A-1
- Rear bench seatback locking: Removal - Refitting 76A-3
- Rear bench seat mechanism: Removal - Refitting 76A-5

**78A REAR SEAT TRIM**
- 1/3 and 2/3 rear bench seat trim: Removal - Refitting 78A-1
- 1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting 78A-3
I - REMOVAL PREPARATION OPERATION

- Disconnect the battery (see Battery: Removal - Refitting (80A, Battery)).
- Remove:
  - the dashboard (see Dashboard: Removal - Refitting (57A, Interior equipment)),
  - the dashboard cross member (see Dashboard cross member: Removal - Refitting (42A, Upper front structure)),
  - the air distribution unit (see Air distribution unit: Removal - Refitting (61A, Heating system)),
  - the central console (see Centre console: Removal - Refitting (57A, Interior equipment)),
  - the gear control unit (see Gear control unit: Removal - Refitting (37A, Mechanical component controls)),
  - the airbag computer (see Airbag computer: Removal - Refitting (88C, Airbag and pretensioners)),
  - the front door sill lining (see Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7),
  - the rear door sill lining (see Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
  - the B-pillar trim (see Body internal trim, B-pillar trim: Removal - Refitting, page 71A-14),
  - the front seat (see Front seat frames and runners, Complete front seat: Removal - Refitting, page 75A-6).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove the clips (1).
- Remove:
  - the rear carpet at (2),
  - the rear section of the front carpet at (3).
- Remove the front section of the carpet.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

- Refit:
  - the front carpet,
  - the rear carpet.

IMPORTANT

To prevent the pyrotechnic components from not working or being accidentally triggered (airbags or pretensioners), wait at least 3 minutes after disconnecting the battery.

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
a. Press anti-lifts

b. Pull

...
I - REMOVAL PREPARATION OPERATION

- Disconnect the battery (see Battery : Removal - Refitting) (80A, Battery).
- Remove:
  - the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7),
  - the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
  - the A-pillar trim (see 71A, Body internal trim, A-pillar trim: Removal - Refitting, page 71A-10),
  - the B-pillar trim (see 71A, Body internal trim, B-pillar trim: Removal - Refitting, page 71A-14),
  - the B-pillar upper trim (see 71A, Body internal trim, B-pillar upper trim: Removal - Refitting, page 71A-12),
  - the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
  - the C-pillar upper trim (see 71A, Body internal trim, C-pillar upper trim: Removal - Refitting, page 71A-15),
  - the sunroof opening control (depending on equipment) (see Sunroof opening control: Removal - Refitting) (52A, Non-side opening element mechanisms),
  - the interior rear-view mirror (see Interior rear-view mirror Removal - Refitting) (57A, Interior equipment),
  - the sun visor (see Sun visor: Removal - Refitting)(57A, Interior equipment),
  - the grab handle (see Grab handle: Removal - Refitting) (57A, Interior equipment).

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove:
  - the centre headlining (1),
  - the sunroof seal carefully (depending on equipment).
- Remove the individual light.
- Disconnect the power supply connector.

IMPORTANT

To prevent the pyrotechnic components from being permanently deactivated or triggered (airbags or pretensioners), wait for at least 3 minutes after disconnecting the battery.

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.

Essential special tooling

Car. 1597: Trim removal lever.

131975: Tool for sunroof opening & closing.

131976: The carpet wet-welding (depending on model equipment).
BODY INTERNAL TRIM
Headlining: Removal - Refitting

Disconnect the power supply connector (2).

Unclip the clips (3).

Unclip the front section at (4) of the headlining using (Car. 1597).

Remove:
- the clips (5),
- the upper section of the front side door seal, partially,
- the upper section of the rear side door seal, partially.

Pull on the headlining and remove it via the rear of the vehicle (this operation requires two people).

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED

Position the headlining in the luggage compartment (this operation requires two people).

Clip on the front section of the headlining.

Fit the rear section of the headlining.

Refit:
- the headlining clips (5),
- the clips (3).

Connect the supply connector (2).

Refit:
- the sunroof seal (depending on equipment level),
- the centre headlining.

Note:
For vehicles equipped with a sunroof, the headlining must be handled with care. The side edges are weakened by the design of the sunroof.
II - FINAL OPERATION

a) Refit:

- the grab handle (see Grab handle: Removal - Refitting) (57A, Interior equipment),
- the interior rear-view mirror (see Interior rear-view mirror Removal - Refitting) (57A, Interior equipment),
- the sun visor (see Sun visor: Removal - Refitting) (57A, Interior equipment),
- the sunroof opening control (depending on equipment level) (see Sunroof opening control: Removal - Refitting) (52A, Non-side opening element mechanisms),
- the C-pillar upper trim (see Body internal trim, C-pillar upper trim: Removal - Refitting, page 71A-15),
- the C-pillar lower trim (see Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
- the B-pillar upper trim (see Body internal trim, B-pillar upper trim: Removal - Refitting, page 71A-12),
- the B-pillar trim (see Body internal trim, B-pillar trim: Removal - Refitting, page 71A-14),
- the A-pillar trim (see Body internal trim, A-pillar trim: Removal - Refitting, page 71A-10),
- the rear door sill lining (see Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
- the front door sill lining (see Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7).

b) Connect the battery (see Battery: Removal - Refitting) (80A, Battery).
**REMOVAL**

- Remove:
  - the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7),
  - the frame seal of the front side door (see Front side door frame seal: Removal - Refitting) (65A, Door sealing).

**OPERATION FOR REMOVAL OF PART CONCERNED**

- Remove:
  - the bolt (1),
  - the cab floor lining (2).

**REFITTING**

**I - REFITTING OPERATION FOR PART CONCERNED**

- Refit:
  - the cab floor lining,
  - the bolt.

**II - FINAL OPERATION**

- Refit:
  - the front side door frame seal (see Front side door frame seal: Removal - Refitting) (65A, Door sealing),
  - the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7).
REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a) Unclip the front door sill lining (1).

REFITTING

I - REFITTING PREPARATION OPERATION

a) Replace the clips of the door sill lining if necessary.

II - REFITTING OPERATION FOR PART CONCERNED

a) Clip on the front door sill lining

130156
Rear door sill lining: Removal - Refitting

**REMOVAL**

**OPERATION FOR REMOVAL OF PART CONCERNED**

a. Unclip the rear door sill lining (1).

**REFITTING**

I - REFITTING PREPARATION OPERATION

a. Replace the clips of the rear door sill lining if necessary.

II - REFITTING OPERATION FOR PART CONCERNED

a. Clip on the rear door sill lining.

130157
REMOVAL

I - REMOVAL PREPARATION OPERATION
a Remove:
- the rear parcel shelf (see Rear parcel shelf: Removal - Refitting) (57A, Interior equipment),
- the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
- the luggage compartment floor lining (see 71A, Body internal trim, Luggage compartment floor lining: Removal - Refitting, page 71A-17),
- the rear panel trim (see 71A, Body internal trim, Rear end panel lining: Removal - Refitting, page 71A-16).

II - OPERATION FOR REMOVAL OF PART CONCERNED
a Remove:
- the lower bolt (1) from the rear seat belt,
- the bolt (2),
- the rear seat control handle (option),
- the luggage compartment light (3),
- the rear seat striker panel trim (4).

a Disconnect the connector.

a Remove the C-pillar lower trim.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED
a Connect the connector.

a Refit the C-pillar lower trim.

a Torque tighten the rear safety C-pillar lower bolt (49 N.m).

a Refit:
- the rear seat control handle (option),
- the bolt,
- the luggage compartment light.

II - FINAL OPERATION.

a Refit:
- the rear panel trim (see 71A, Body internal trim, Rear end panel lining: Removal - Refitting, page 71A-16),
- the luggage compartment floor lining (see 71A, Body internal trim, Luggage compartment floor lining: Removal - Refitting, page 71A-17),
- the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
- the rear parcel shelf (see Rear parcel shelf: Removal - Refitting) (57A, Interior equipment).
A-pillar trim: Removal - Refitting

**REMOVAL**

I - REMOVAL PREPARATION OPERATION

a. Partially remove the front side door seal (1).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Unclip the top of the A-pillar trim at (2).

b. Remove the A-pillar trim by pulling upwards at (3).

**REFITTING**

I - REFITTING PREPARATION OPERATION

a. Replace the A-pillar clips, if necessary.

II - REFITTING OPERATION FOR PART CONCERNED

a. Refit the bottom of the trim at (4) and (5).
a. Refit the seal (6) of the front side door.
B-pillar upper trim: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

- Remove:
  - the front door sill lining (see Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7)
  - the rear door sill lining (see Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8)
  - the B-pillar trim (see Body internal trim, B-pillar trim: Removal - Refitting, page 71A-14)
  - the front side door seal partially (see Front side door frame seal: Removal - Refitting)
  - the rear side door seal partially (see Rear side door seal: Removal - Refitting)

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove the cover.
- Remove:
  - the seat belt upper bolt (1)
  - the seat belt, partially.
- Unclip the clips using the trim removal tool (Car. 1597).
- Remove the top of the trim at (3).
- Lift the trim at (4).
- Remove the B-pillar upper trim.
I - REFITTING OPERATION FOR PART CONCERNED

a. Refit:
- the B-pillar upper trim at (4) and (5),
- the seat belt,
- the seat belt upper bolt.

b. Torque tighten the seat belt upper bolt (49 N.m).

c. Refit the cover.

II - FINAL OPERATION

a. Refit:
- the rear side door seal (see Rear side door seal: Removal - Refitting) (65A, Opening element sealing),
- the front side door seal (see Front side door frame seal: Removal - Refitting) (65A, Opening element sealing),
- the B-pillar trim (see 71A, Body internal trim, B-pillar trim: Removal - Refitting, page 71A-14),
- the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
- the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7).
B-pillar trim: Removal - Refitting

### REMOVAL

**I - REMOVAL PREPARATION OPERATION**

* a. Remove:
  - the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7)
  - the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8)

**II - OPERATION FOR REMOVAL OF PART CONCERNED**

* a. Remove the cover (1)
  a. Unclip the B-pillar trim at (2) and (3)

### REFITTING

**I - REFITTING OPERATION FOR PART CONCERNED**

* a. Clip on the B-pillar trim
  a. Refit the cover

**II - FINAL OPERATION**

* a. Refit:
  - the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8)
  - the front door sill lining (see 71A, Body internal trim, Front door sill lining: Removal - Refitting, page 71A-7)
REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove:
- the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8),
- the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Open the covers.

a. Remove:
- the rear seat belt upper bolt (1),
- the bolt (2),
- bolt (3).

a. Disconnect the connector.

a. Remove the C-pillar upper trim.

REFITTING

I - REFITTING PREPARATION OPERATION

a. Check the condition of the clips and replace if necessary.

II - REFITTING OPERATION FOR PART CONCERNED

a. Connect the supply connector.

a. Refit the C-pillar upper trim.

a. Torque tighten the rear seat belt upper bolt (49 N.m) (1).

a. Refit:
- the bolt (2),
- the bolt (3),
- the covers.

III - FINAL OPERATION

a. Refit:
- the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
- the rear door sill lining (see 71A, Body internal trim, Rear door sill lining: Removal - Refitting, page 71A-8).

Tightening torques

m rear seat belt upper bolt 49 N.m
REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED
a. Open the rear end panel lining (2).

Remove:
- the bolts (1),
- the rear central luggage compartment floor (3),
- the front luggage compartment floor box.

Remove:
- the luggage compartment net hook bolts (4),
- the clips (5),
- the rear end panel lining.

REFITTING

I - REFITTING PREPARATION OPERATION
a. Check the condition of the clips and replace them if necessary.

II - REFITTING OPERATION FOR PART CONCERNED
a. Refit:
   - the rear end panel lining,
   - the clips (5),
   - the luggage compartment net hook bolts (4),
   - the front luggage compartment floor box,
   - the rear central luggage compartment floor (3).

a. Close the rear end panel lining (2).

a. Refit the bolts (1).

71A

Luggage compartment floor lining: Removal - Refitting

**REMOVAL**

**OPERATION FOR REMOVAL OF PART CONCERNED**

- Remove the panel from the rear central luggage compartment floor (1).
- Remove:
  - the front luggage compartment floor box (2),
  - the side luggage compartment floors (3),
  - the front central luggage compartment floor (4),
  - the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9).
- Unclip the box clip.
- Remove the side luggage compartment box (5).
- Unclip the box clip.
- Remove the side luggage compartment box (6).

**REFITTING**

**REFITTING OPERATION FOR PART CONCERNED**

- Refit:
  - the side luggage compartment boxes,
  - the clips,
  - the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
  - the front central luggage compartment floor,
  - the side luggage compartment floors,
  - the front luggage compartment floor box,
  - the rear central luggage compartment floor.
REMOVAL

I - REMOVAL PREPARATION OPERATION

a Unclip the trim (1) from the door mirror using the tool (Car. 1363).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Unclip the trim (2) using the (Car. 1363).

a Disconnect the supply connectors (depending on equipment level).

a Remove the bolts (3).

Essential special tooling

Set of trim removal levers.
SIDE OPENING ELEMENT TRIM
Front side door trim: Removal - Refitting

- Remove the control board (4) using the tool Car.1363.
- Disconnect the supply connectors.
- Remove the front side door trim partially.
- Unclip the interior opening control cable using a flat-blade screwdriver.
- Disconnect the door sill light connector.

REFITTING

I - REFITTING PREPARATION OPERATION
- If necessary, replace the clips on the front side door trim.

II - REFITTING OPERATION FOR PART CONCERNED
- Connect the supply connector (depending on equipment level).
- Clip on the door interior handle cable.
- Refit the front side door trim.
- Connect the supply connector.
- Refit:
  - the control board (5),
  - the bolts (6).
- Connect the door mirror switch connector.
- Refit the trim (7).

III - FINAL OPERATION
- Check that it is working correctly.
- Clip the trim (1) onto the door mirror.
REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove:
   - the covers,
   - the bolts (1).

a. Remove the plate (2) using the (Car. 1363).

a. Disconnect the power supply connector.

a. Remove the rear side door trim partially.

a. Unclip the rear side door interior opening release cable.

a. Disconnect the supply connector.

REFITTING

I - REFITTING PREPARATION OPERATION

a. If necessary, replace the clips on the rear side door trim.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Connect the power supply connector (depending on the equipment level).

a. Clip on the rear side door interior opening release cable.

a. Refit the rear side door trim.

a. Connect the supply connector.

a. Refit:
   - the plate (2),
   - the bolts (1).

III - FINAL OPERATION

a. Check that it is working correctly.

Essential special tooling

Essential special tooling

Car. 1363
Set of trim removal levers.

130170
REMOVAL

I - REMOVAL PREPARATION OPERATION

a Remove the trim (1) using the Car. 1363.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Remove:
- the clips (2),
- the tailgate lower trim.

a Remove the upper trim (3) from the tailgate.

a Remove the side trim (4) from the tailgate.

REFITTING

I - REMOVAL PREPARATION OPERATION

a Replace the tailgate trim clips if necessary.

II - REFITTING OPERATION FOR PART CONCERNED

a Refit:
- the side trim (4) on the tailgate,
- the upper trim (3) on the tailgate,
- the lower trim on the tailgate,
- the clips (2),
- the trim (1).

Essential special tooling

Car. 1363
Set of trim removal levers.

130172
130173
130174
130175
Tailgate hatch trim: Removal - Refitting

**Removal**

**Operation for removal of part concerned**

- Support the boot chute trim using a suitable tool.
- Remove:
  - the trim (1) using the Car. 1363 tool,
  - the handle cover.
- Remove:
  - the bolts (2),
  - the boot chute handle.
- Remove the bolt (3).

**Essential special tooling**

- Car. 1363: Set of trim removal levers.
**Removal - Refitting**

**I - Removal Operation**

1. Remove the upper trim (4) from the boot chute.

**II - Refitting Operation**

1. Refit:
   - the upper trim (4) of the boot chute,
   - the bolt (3),
   - the boot chute handle,
   - bolt (2).

2. Support the trim using a suitable tool.
3. Refit the trim (1).
FRONT SEAT FRAMES AND RUNNERS

Front seat frame: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Disconnect the battery (see Battery: Removal - Refitting (80A, Battery)).

a. Remove:
   - the complete front seat (see 75A, Front seat frames and runners, Complete front seat: Removal - Refitting, page 75A-6),
   - the front seat belt buckle stalk (see Front seat belt buckle: Removal - Refitting) (88C, Airbag and pretensioners),
   - the head rest.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove the seat slide and the height adjuster switch (1).

a. Remove the height adjuster lever (1).

Tightening torques

front seat frame bolts 49 N.m

IMPORTANT

To prevent the pyrotechnic components from being permanently deactivated or triggered (airbags or pretensioners), wait for at least 3 minutes after disconnecting the battery.

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
Front seat frame: Removal - Refitting

1. Unclip the seat trim (2).
2. Remove the retaining strip (3).
3. Remove the bolt (4).
4. Unclip the trim at (5) and (6).
5. Disconnect the power supply connector.
6. Remove the bolt (7).
7. Unclip the trim at (8) and (9).
8. Remove the lumbar adjustment lever knob (10).
Front seat frame: Removal - Refitting

- Open the zip fasteners (11).
- Remove the headrest guides from the support (12).
- Separate the airbag module from the fabric of the seatback trim.
- Remove the seatback trim - foam assembly from the front seat frame.
- Unclip the seat base trim retaining sections (13).
- Unclip the retaining sections (14).
- Disconnect the connectors (15).
- Remove the seat base trim - foam assembly.
FRONT SEAT FRAMES AND RUNNERS
Front seat frame: Removal - Refitting

remove:
- the bolts (16) from the front seat frame on each side,
- the front seat frame.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED
refit:
- the front seat frame,
- the front seat frame bolts.

- torque tighten the front seat frame bolts (49 N.m).
- refit the seat base trim - foam assembly.
- connect the connectors (15).

- refit:
  - the retaining sections (14),
  - the seat base trim retaining sections (13),
  - the front side airbag (chest level) (see Front (chest) side airbag: Removal - Refitting (88C, Airbag and pretensioners)),
  - the headrest guides on the support (12).

- close the zip fasteners.
- refit:
  - the lumbar adjustment lever knob,
  - the trim ,
  - the bolts (7) ,
  - connect the connectors.
  - refit:
    - the trim ,
    - the bolt (4) ,
    - the retaining strips,
    - the trim (2),
- refit the height adjustment lever.
- refit the seat slide and the height adjuster switch.

II - FINAL OPERATION.
refit:
- the front seat belt buckle stalk (see Front seat belt buckle: Removal - Refitting (88C, Airbag and pretensioners)),
- the headrest,
- the entire front seat (see 75A, Front seat frames and runners, Complete front seat: Removal - Refitting, page 131990).
- connect the battery (see Battery : Removal - Refitting (80A, Battery)).
Front seat control keypad: Removal - Refitting

FRONT SEAT TYPE 04

REMOVAL

I - REMOVAL PREPARATION OPERATION

a Remove the front seat trim bolt (1).

a Unclip the front seat trim (2).

a Disconnect the connectors.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Remove the front seat control switch (3).

a Remove:
- the bolts (4),
- the front seat control keypad (5).

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a Refit:
- the front seat control keypad,
- the bolts,
- the front seat control switch.

II - FINAL OPERATION.

a Connect the connectors.

a Clip on the front seat trim.

a Refit the front seat trim bolt.

Note:
Move the seat as far forward as possible to remove the front seat trim.
COMPLETE FRONT SEAT: REMOVAL - REFITTING

REMOVAL

I - REMOVAL PREPARATION OPERATION

a) Disconnect the battery (see Battery: Removal - Refitting).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a) Remove the covers (1).

a) Remove the bolts (2) from the entire front seat.

a) Move the seat as far forward as possible.

a) Remove the bolts (3) from the entire front seat.

a) Disconnect the connectors under the seat (depending on equipment level).

a) Remove the front seat.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a) Fit the seat, in the vehicle.

a) Connect the connectors under the seat (depending on equipment level).

a) Refit the bolts (3).

a) Torque tighten the complete front seat bolts (40 N.m) (3).

a) Refit the bolts (2).

a) Torque tighten the complete front seat bolts (40 N.m) (2).

IMPORTANT

To avoid any triggering at the time of an operation on or near to a pyrotechnic component (airbags or pretensioners), wait for at least three minutes after battery disconnection.
FRONT SEAT FRAMES AND RUNNERS
Complete front seat: Removal - Refitting

a. Move the seat back.

b. Refit the covers.

II - FINAL OPERATION.

a. Connect the battery (see Battery: Removal - Refitting (80A, Battery)).
REMOVAL

OPERATION FOR REMOVAL OF PART

CONCERNED

1. Remove the rear seat base hinge cover (1).
2. Remove the lower bolts (2) from the rear seat base.
3. Tilt the rear seat base (4).
4. Remove:
   - the rear seat base upper bolts (3),
   - the rear seat base (4).
5. Remove:
   - the side hinge cover,
   - the seatback nuts (5),
   - the rear centre seat belt lower bolt.

Tightening torques

- seatback bolts: 25 N.m
- seatback nuts: 25 N.m
- lower bolts of the rear central seat belt: 49 N.m
- upper bolts of the rear seat base: 28 N.m
- lower bolts of the rear seat base: 28 N.m
REAR SEAT FRAMES AND RUNNERS
Complete rear seat: Removal - Refitting

**Removal**

- the seatback bolts (6),
- the seatback.

**Refitting**

**Refitting Operation for Part Concerned**

- Fit the seatback.
- Refit:
  - the seatback bolts,
  - the seatback nuts,
  - the rear centre seat belt lower bolt.

- Torque tighten:
  - the seatback bolts (25 N.m),
  - the seatback nuts (25 N.m),
  - the lower bolt of the rear central seat belt (49 N.m).

- Refit:
  - the side hinge cover,
  - the seat base,
  - the rear seat base upper bolts,
  - the rear seat base lower bolts.

- Torque tighten:
  - the upper bolts of the rear seat base (28 N.m),
  - the lower bolts of the rear seat base (28 N.m).

- Refit the rear seat base hinge cover.

**Note:**
If the vehicle is equipped with the Easy Break system, partially remove the carpet in order to disconnect the cable from the control unit.

**Note:**
If the vehicle is equipped with the Easy Break system, reconnect the control unit cable.

**Note:**
If the vehicle is equipped with the Easy Break system, check that the system is operating correctly.
REAR SEAT FRAMES AND RUNNERS
Rear bench seatback locking: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a Remove:
- the headrest,
- the rear centre armrest (see 79A, Seat components, Rear centre arm rest: Removal - Refitting, page 79A-5),
- the rear bench seatback (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1),
- the rear bench seatback trim (see 78A, Rear seat trim, 1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting, page 78A-3).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Remove:
- the bolts (1),
- the foam-cover assembly, partially.

a Remove the rear bench seatback unlocking mechanism bolt (2).

a Unclip the cable hook at (3) and (4).

a Remove the rear bench seatback unlocking mechanism (5).

a Unclip the cable at (6).

a Remove:
- the clips (7),
- the rear bench seatback unlocking cable.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a Refit:
- the clips,
- the rear bench seatback unlocking cable,
- the rear bench seatback unlocking mechanism,
- the cable hook.
REAR SEAT FRAMES AND RUNNERS

Rear bench seatback locking: Removal - Refitting

- the rear bench seatback unlocking mechanism bolts (2).
  - Torque tighten the rear bench seatback unlocking mechanism bolts (20 N.m).
  - Refit:
    - the foam-cover assembly,
    - the bolts (1).

II - FINAL OPERATION.

- Refit:
  - the rear bench seatback trim (see 78A, Rear seat trim, 1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting, page 78A-3),
  - the rear bench seatback (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1),
  - the rear centre armrest (see 79A, Seat components, Rear centre arm rest: Removal - Refitting, page 79A-5),
  - the head rest.
REAR SEAT FRAMES AND RUNNERS
Rear bench seat mechanism: Removal - Refitting

REMOVAL
I - REMOVAL PREPARATION OPERATION

- Remove:
  - the rear bench seatback (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1),
  - the luggage compartment floor lining (see 71A, Body internal trim, Luggage compartment floor lining: Removal - Refitting, page 71A-17),
  - the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
  - the rear end panel lining (see 71A, Body internal trim, Rear end panel lining: Removal - Refitting, page 71A-16),
  - the rear floor carpet.

II - OPERATION FOR REMOVAL OF PART CONCERNED

- Remove:
  - the bolts (1),
  - the relay nuts (2),
  - the clip (3),
  - the relay unit and the handle,
  - the cable.

- Remove:
  - the bolts (4),
  - the clips (5),
  - the lever unit,
  - the cable.

- Remove:
  - the bolts (6) of the rear bench seatback striker panel,
  - the rear bench seatback striker panel.

REFITTING
I - REFITTING OPERATION FOR PART CONCERNED

- Refit:
  - the rear bench seatback striker panel,
  - the bolts of the rear bench seatback striker panel.

- Torque tighten the bolts of the rear bench seatback striker panel (40 N.m).
II - FINAL OPERATION.

Refit:
- the rear floor carpet,
- the rear end panel lining (see 71A, Body internal trim, Rear end panel lining: Removal - Refitting, page 71A-16),
- the C-pillar lower trim (see 71A, Body internal trim, C-pillar lower trim: Removal - Refitting, page 71A-9),
- the luggage compartment floor lining (see 71A, Body internal trim, Luggage compartment floor lining: Removal - Refitting, page 71A-17),
- the rear bench seatback (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1).
REAR SEAT TRIM
1/3 and 2/3 rear bench seat trim: Removal - Refitting

REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove the 1/3 and 2/3 rear bench seat base (see 1/3 and 2/3 rear bench seat: Removal - Refitting).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove:
   - the bolts (1),
   - the rear bench seat lock trim (2).

a. Uncover the seat base trim at (3).

a. Unclip the trims at (4).

a. Remove the trim and foam from the seat base.

a. Cut the seat base trim retaining clips.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Refit the seat base trim on the foam.

a. Check that the trim is correctly positioned on the foam.

REAR SEAT TRIM

1/3 and 2/3 rear bench seat trim: Removal - Refitting

Refit:
- the foam-trim assembly on the seat base frame,
- the clips (4).

Cover the seat base trim.

Refit:
- the rear bench seat lock trim,
- the bolts.

II - FINAL OPERATION.

Refit the 1/3 and 2/3 rear bench seat (see 1/3 and 2/3 rear bench seat: Removal - Refitting).
REAR SEAT TRIM
1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting

I - REMOVAL PREPARATION OPERATION

a. Remove:
- the headrest,
- the rear centre armrest (see 79A, Seat components, Rear centre armrest: Removal - Refitting, page 79A-5),
- the 1/3 and 2/3 rear bench seatback (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove the trim at (1).
a. Remove:
- the bolts (2),
- the rear bench seat lock trim (3),
- the armrest trim (4),
- the bolt.
a. Open the zip fasteners (5).
a. Unclip the lower cover at (6).
REAR SEAT TRIM
1/3 and 2/3 rear bench seatback trim: Removal - Refitting

- Remove the cover at (7).
- Remove:
  - the cover partially to access the headrest guides,
  - the headrest guides (8).
- Cut the seatback trim retaining clips.
- Remove the 1/3 and 2/3 rear bench seatback trim.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED
- Refit:
  - the 1/3 and 2/3 rear bench seatback trim,
  - clip the seatback trim onto the foam.
  - Check that the trim is correctly positioned on the foam.
- Refit:
  - the headrest guides,
  - the cover,
  - the cover (7),
  - the lower cover (6).
- Close the zip fasteners.
- Refit:
  - the bolt,
  - the armrest trim,
  - the rear bench seat lock trim,
  - the bolts (2),
  - the trim (1).

II - FINAL OPERATION.
- Refit:
  - the 1/3 and 2/3 rear bench seatbacks (see 76A, Rear seat frames and runners, Complete rear seat: Removal - Refitting, page 76A-1),
  - the head rest.
Seat Components

Seatback Tray Removal - Refitting

FRONT SEAT TYPE 02

REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

- Remove:
  - the nuts (1),
  - the seatback table.

REFITTING

REFITTING OPERATION FOR PART CONCERNED

- Refit:
  - the seatback table,
  - the nuts (1).
Front seat headrest guide: Removal - Refitting

I - REMOVAL PREPARATION OPERATION

a Disconnect the battery (see Battery: Removal - Refitting) (80A, Battery).

a Remove:
- the complete front seat (see 75A, Front seat frames and runners, Complete front seat: Removal - Refitting, page 75A-6),
- the seatback table (see 79A, Seat components, Seatback tray: Removal - Refitting, page 79A-1),
- the front seat belt buckle stalk (see Front seat buckle: Removal - Refitting) (88C, Airbag and pretensioners),
- the head rest.

II - OPERATION FOR REMOVAL OF PART CONCERNED

a Remove the seat slide and the height adjuster switch (1).

a Remove the height adjuster lever (1).

a Unclip the seat trim (2).

a Remove the retaining strip (3).

IMPORTANT

To prevent the pyrotechnic components from being permanently deactivated or triggered (airbags or pretensioners), wait for at least 3 minutes after disconnecting the battery.

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.
SEAT COMPONENTS
Front seat headrest guide: Removal - Refitting

- Remove the bolt (4).
- Unclip the trim at (5) and (6).
- Disconnect the connector.
- Remove the bolt (7).
- Unclip the trim at (8) and (9).
- Remove the lumbar adjustment lever knob (10).
- Open the zip fasteners (11).
- Extract the headrest guides (12) from the support.

REFITTING

- Refit the headrest guides on the support.
- Close the zip fasteners.
- Refit:
  - the lumbar adjustment lever knob,
  - the trim,
  - the bolt (7),
  - the connector.
Front seat headrest guide: Removal - Refitting

- the trim,
- the bolt (4),
- the retaining strip,
- the seat trim (2).

Refit the height adjustment lever.

Refit the seat slide and the height adjuster switch.

II - FINAL OPERATION.

Refit:
- the headrest,
- the front seat belt buckle stalk (see Front seat belt buckle: Removal - Refitting) (88C, Airbag and pretensioners),
- the seatback table (see Seatback tray: Removal - Refitting, page 79A-1),
- the entire front seat (see Front seat frames and runners, Complete front seat: Removal - Refitting, page 75A-6).

Connect the battery (see Battery: Removal - Refitting) (80A, Battery).
REMOVAL

OPERATION FOR REMOVAL OF PART CONCERNED

a. Remove:
   - the rear central armrest clip (1),
   - the rear central armrest at (2) and (3).

REFITTING

REFITTING OPERATION FOR PART CONCERNED

a. Refit:
   - the rear central armrest,
   - the rear central armrest clip.
REMOVAL

I - REMOVAL PREPARATION OPERATION

a. Remove:
- the headrest,
- the rear bench seatback trim, partially (see 'Rear seat trim, 1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting', page 78A-3).

II - OPERATION FOR REMOVAL OF PART CONCERNED

a. Extract the headrest guides (1) from the support.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

a. Refit the new headrest guides on the support.

II - FINAL OPERATION

a. Refit:
- the rear bench seatback trim (see 'Rear seat trim, 1/3 and 2/3 rear bench seat seatback trim: Removal - Refitting', page 78A-3),
- the headrest.
